

MOHAMMED WASIM KHAN

Visakhapatnam, Andhra Pradesh, India
+91-9640011405 wasim143mr@gmail.com LinkedIn GitHub

Professional Summary

Full Stack Developer and AI/ML Engineer with expertise in building scalable web applications and intelligent data systems. Proficient in the MERN stack (MongoDB, Express.js, React, Node.js), Python, and Machine Learning frameworks including TensorFlow and Scikit-learn. Experienced in REST API design, database optimization, NLP pipelines, and RAG architectures. Currently working as a Software Development Instructor at NxtWave, with prior internship experience at Vizag Steel Plant. Passionate about building real-world solutions that combine strong engineering with data-driven intelligence.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, Java, C++, SQL, Bash, HTML5, CSS3
Frontend: React, Angular, Vite, Redux, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, Flask, FastAPI, RESTful APIs, JWT Authentication
AI & ML: TensorFlow, Scikit-learn, NLP, NLTK, Pandas, NumPy, RAG Architecture, Azure OpenAI, Deep Learning
Databases: MongoDB, PostgreSQL, MySQL, SQLite, Query Optimization, Indexing
Tools & DevOps: Git, Docker, AWS, Linux, CI/CD, Postman, Jupyter Notebooks
Core CS: Data Structures & Algorithms, System Design, OOP, DBMS, Agile Methodologies

Education

VIT-AP University, Amaravathi <i>Integrated M-Tech in Software Engineering (Computer Science)</i>	Nov 2021 – Present <i>CGPA: 8.33/10</i>
Narayana Junior College, Vizag <i>Intermediate (MPC)</i>	May 2018 – July 2020 <i>CGPA: 8.88/10</i>

Experience

Software Development Instructor Intern <i>NxtWave Disruptive Technologies</i>	Apr 2026 – Present <i>Hyderabad, IN (Hybrid)</i>
- Delivering frontend web development instruction covering React, JavaScript, and modern web technologies to students, translating complex concepts into structured, project-based learning paths. - Reviewing and debugging student projects daily, reinforcing best practices in component architecture, REST API integration, and database-driven application design. - Strengthened technical communication and documentation skills by explaining code architecture, UI/UX patterns, and debugging workflows to learners at varying skill levels.	
Software & Data Engineering Intern <i>Rashtriya Ispat Nigam Limited (Vizag Steel Plant)</i>	Jul 2024 <i>Visakhapatnam, IN</i>
- Built a full-stack healthcare management system using React and Node.js, handling 5,000+ daily transactions with robust data integrity and a 20% reduction in patient wait times. - Designed automated ETL workflows eliminating 30% of manual data entry errors across manufacturing operations, improving downstream data quality. - Optimized PostgreSQL and MySQL queries through execution plan analysis and indexing, reducing average response time from 850ms to 240ms — a 72% improvement.	

Projects

AI Interview Preparation Bot <i>React, Node.js, Azure OpenAI, RAG, MongoDB</i>	Jan 2026
- Architected a full-stack AI coaching platform using RAG architecture and Azure OpenAI to parse PDF resumes and deliver personalized, context-aware technical Q&A, reducing preparation time by 40%. - Designed RESTful APIs managing PDF ingestion, vector-based retrieval pipelines, and dynamic response delivery across a React frontend and Node.js/Express backend.	
CodeToCareer - Placement Platform <i>React, Node.js, Express.js, MongoDB, JWT</i>	Dec 2025
Developed a comprehensive full-stack MERN platform with course management, real-time discussion forums, and role-based dashboards serving 200+ active users.	

- Built scalable RESTful APIs with JWT authentication achieving sub-150ms response times for 95% of endpoints through performance profiling and query optimization.

Spam Email Detection System | *Python, Scikit-learn, NLP, NLTK, TF-IDF* **Mar 2025**

- Engineered an NLP classification pipeline processing 15,000+ samples using tokenization, stemming, and TF-IDF vectorization; benchmarked Naive Bayes, SVM, and Random Forest models.
- Achieved 96% precision and 0.95 F1-score through hyperparameter tuning, minimizing false positives critical for production-grade classification systems.

Smart Attendance System | *Python, OpenCV, CNN, Deep Learning, MySQL* **Aug 2024**

- Built a real-time facial recognition attendance system using CNN embeddings, achieving 98% detection accuracy across 500+ student profiles.
- Automated attendance logging via MySQL and SQLite handling 300+ daily scans, reducing manual processing time by 90%.

Text-Based Emotion Classifier | *Python, NLP, SVM, ANN, N-grams* **Jun 2024**

- Implemented multilingual text classification using Naive Bayes, SVM, and ANN on Indian language datasets; engineered N-gram models to handle complex linguistic patterns and improve retrieval accuracy.

Certifications & Achievements

Gemini Certified University Student | *Google* **Dec 2025**

Object Oriented Programming - Basics to Advanced | *Udemy* **Nov 2023**

University Chess Player | *Strategic thinking and analytical problem solving*
