

MOHAMMED WASIM KHAN

Visakhapatnam, Andhra Pradesh, India

+91-9640011405 wasim143mr@gmail.com LinkedIn GitHub

Professional Summary

Data Analyst with strong expertise in Python, SQL, statistical modeling, and machine learning. Experienced in building end-to-end data pipelines, performing exploratory data analysis (EDA), and delivering actionable business insights through data visualization and predictive modeling. Proficient in Pandas, NumPy, Scikit-learn, and database optimization across PostgreSQL and MySQL. Demonstrated ability to process large datasets (15,000+ records), reduce query response times by 72%, and improve operational efficiency through data-driven decision making.

Technical Skills

Data Analysis: Python, Pandas, NumPy, Exploratory Data Analysis (EDA), Statistical Analysis, Hypothesis Testing
Machine Learning: Scikit-learn, TensorFlow, Regression, Classification, Clustering, SVM, Random Forest, Naive Bayes
NLP & Text Analytics: NLTK, TF-IDF, Tokenization, Stemming, N-gram Models, Sentiment Analysis
Data Visualization: Matplotlib, Seaborn, Jupyter Notebooks, Dashboard Reporting
Databases & SQL: PostgreSQL, MySQL, SQLite, MongoDB, Query Optimization, Indexing, ETL Pipelines
Tools & Platforms: Git, Docker, AWS, Linux, CI/CD, Excel, Postman
Languages: Python, SQL, JavaScript, TypeScript, Java, Bash
Core CS: Data Structures, DBMS, Statistics, OOP, Agile Methodologies

Education

VIT-AP University, Amaravathi

Nov 2021 – Present

Integrated M-Tech in Software Engineering (Computer Science)

CGPA: 8.33/10

Narayana Junior College, Vizag

May 2018 – July 2020

Intermediate (MPC)

CGPA: 8.88/10

Experience

Software Development Instructor Intern

Apr 2026 – Present

NxtWave Disruptive Technologies

Hyderabad, IN (Hybrid)

- Analyzed student performance data and learning patterns to identify knowledge gaps, iterating on instructional content for improved outcomes across 50+ learners.
- Delivered structured technical instruction on frontend development, translating complex data-backed insights into actionable learning modules.
- Maintained documentation and progress tracking systems, applying data organization skills to monitor learner engagement and course effectiveness.

Software & Data Engineering Intern

Jul 2024

Rashtriya Ispat Nigam Limited (Vizag Steel Plant)

Visakhapatnam, IN

- Designed and implemented scalable ETL pipelines processing 5,000+ daily healthcare transactions, ensuring data integrity and reducing patient wait times by 20%.
- Performed SQL query optimization on PostgreSQL and MySQL databases, reducing average query response time from 850ms to 240ms (72% improvement) through execution plan analysis, indexing, and query restructuring.
- Built automated data workflows that eliminated 30% of manual data entry errors, significantly improving downstream data quality for operational analytics and reporting.

Projects

Spam Email Detection System | *Python, Scikit-learn, NLP, NLTK, TF-IDF, Pandas*

Mar 2025

- Engineered a full ML classification pipeline from raw data through EDA, preprocessing (tokenization, stemming, TF-IDF vectorization), model training, and evaluation on a 15,000+ sample dataset.
- Benchmarked Multinomial Naive Bayes, SVM, and Random Forest with hyperparameter tuning; achieved 96% precision and 0.95 F1-score with minimized false positive rate — critical for business-grade classification.

Text-Based Emotion Classifier | *Python, NLP, SVM, ANN, N-grams, Pandas*

Jun 2024

- Performed EDA and feature engineering on multilingual and Indian language text datasets, applying N-gram models and advanced NLP techniques to improve classification signal quality.

- Implemented and compared Naive Bayes, SVM, and ANN models, achieving statistically significant improvements in retrieval accuracy for localized text data through iterative model evaluation.

Smart Attendance System | *Python, OpenCV, CNN, MySQL, SQLite, Data Logging*

Aug 2024

- Built a data collection and logging system processing 300+ daily facial recognition scans, storing structured attendance records in MySQL and SQLite for real-time querying and reporting.
- Achieved 98% detection accuracy across 500+ student profiles; reduced manual data processing time by 90% through automated pipeline design — a measurable efficiency gain with direct business impact.

AI Interview Preparation Bot | *Python, RAG, NLP, Azure OpenAI, MongoDB*

Jan 2026

- Designed a data ingestion pipeline parsing unstructured PDF resumes into structured vector embeddings, enabling context-aware retrieval and personalized Q&A generation using RAG architecture.
- Reduced candidate interview preparation time by 40% through data-driven feedback loops and targeted insight delivery from processed resume and job description datasets.

Certifications & Achievements

Gemini Certified University Student | *Google*

Dec 2025

Object Oriented Programming - Basics to Advanced | *Udemy*

Nov 2023

University Chess Player | *Analytical thinking and strategic data-driven decision making*
