

MOHAMMED WASIM KHAN

Visakhapatnam, Andhra Pradesh, India

+91-9640011405 wasim143mr@gmail.com LinkedIn GitHub

Professional Summary

Web Developer with solid expertise in building responsive, performant, and user-friendly web applications across the full stack. Proficient in React, JavaScript (ES6+), TypeScript, Node.js, and modern CSS frameworks including Tailwind CSS. Experienced in delivering cross-browser compatible interfaces, optimizing web performance, and integrating REST APIs into dynamic frontend applications. Hands-on teaching experience with web technologies at NxtWave, reinforcing deep foundational knowledge in HTML, CSS, JavaScript, and React component architecture.

Technical Skills

Frontend: React, Angular, Vite, Redux, Context API, HTML5, CSS3, Tailwind CSS, Responsive Design, Cross-Browser Compatibility

JavaScript: ES6+, TypeScript, Async/Await, DOM Manipulation, Event Handling, Component Architecture

Backend: Node.js, Express.js, Flask, FastAPI, RESTful APIs, JWT Authentication, MVC Pattern

Databases: MongoDB, PostgreSQL, MySQL, SQLite, Database Schema Design, Query Optimization

Web Performance: Code Splitting, Lazy Loading, API Optimization, sub-150ms Response Times

Tools & DevOps: Git, GitHub, Docker, AWS, Linux, CI/CD, Postman, Figma

Languages: JavaScript, TypeScript, Python, Java, C++, SQL, Bash

Core CS: Data Structures, OOP, System Design, Agile/Scrum, DBMS

Education

VIT-AP University, Amaravathi

Nov 2021 – Present

Integrated M-Tech in Software Engineering (Computer Science)

CGPA: 8.33/10

Narayana Junior College, Vizag

May 2018 – July 2020

Intermediate (MPC)

CGPA: 8.88/10

Experience

Software Development Instructor Intern

Apr 2026 – Present

NxtWave Disruptive Technologies

Hyderabad, IN (Hybrid)

- Taught frontend web development to students covering HTML5, CSS3, JavaScript (ES6+), and React — reinforcing deep expertise in responsive layouts, component-based architecture, and UI best practices.
- Reviewed and debugged student web projects daily, guiding fixes around cross-browser compatibility, layout issues, API integration, and JavaScript performance bottlenecks.
- Created and refined instructional content including code walkthroughs, UI pattern breakdowns, and project-based challenges, improving learner engagement and practical skill retention.

Software & Data Engineering Intern

Jul 2024

Rashtriya Ispat Nigam Limited (Vizag Steel Plant)

Visakhapatnam, IN

- Developed a full-stack web application using React and Node.js for healthcare management, handling 5,000+ daily transactions with a responsive UI and reducing patient wait times by 20%.
- Built and integrated RESTful APIs connecting React frontend to PostgreSQL and MySQL backends, ensuring seamless data flow and consistent cross-device user experience.
- Optimized SQL query performance through indexing and execution plan analysis, improving backend response times by 72% — directly improving web application load performance.

Projects

CodeToCareer - Web Platform | *React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT*

Dec 2025

- Designed and developed a fully responsive web platform with React featuring course management, real-time discussion forums, and role-based dashboards serving 200+ active users.
- Built a performant frontend with Tailwind CSS and React Router, achieving consistent rendering across Chrome, Firefox, and Safari with sub-150ms API response times for 95% of endpoints.
- Integrated JWT authentication flows, protected routing, and stateful session management across the frontend and Express.js backend.

AI Interview Preparation Bot | *React, Node.js, Azure OpenAI, MongoDB, REST API*

Jan 2026

- Built a React-based SPA with dynamic form inputs, file upload (PDF resume parsing), and real-time AI-generated Q&A rendering — delivering a smooth, interactive web experience.
- Designed and consumed a custom REST API layer integrating Azure OpenAI, reducing interview preparation time by 40% through responsive, context-aware UI feedback loops.

Smart Attendance System | *Python, OpenCV, CNN, MySQL, Web Dashboard*

Aug 2024

- Developed an automated facial recognition attendance system with a web-accessible reporting dashboard, enabling real-time data querying across 300+ daily entries for 500+ student profiles.
- Achieved 98% detection accuracy and reduced manual attendance processing by 90% through seamless integration of Python backend processing with database-driven web reporting.

Spam Email Detection System | *Python, Flask, REST API, Scikit-learn, NLP*

Mar 2025

- Built a Flask-powered web API serving an NLP classification model trained on 15,000+ samples, exposing a clean REST endpoint for real-time spam detection with 96% precision.
- Packaged the ML pipeline (tokenization, TF-IDF, inference) behind a web API interface, demonstrating ability to bridge data science outputs into deployable web services.

Certifications & Achievements

Gemini Certified University Student | *Google*

Dec 2025

Object Oriented Programming - Basics to Advanced | *Udemy*

Nov 2023

University Chess Player | *Logical thinking and systematic problem solving*
